Activity 1: Institutionalizing the project in Zanzibar and recruitment of technical team		
1.1	Visit and presenting the project to management of TAMISEMI	Ruth and Victor
1.2	Inception meeting in Zanzibar	Ruth and Victor
1.3	Recruitment of technical team	
1.4	Initial entry team planning meeting with MoWEM and TAMISEMI	All team members (virtual and physical)
Activity 2: Data collection on Zanzibar biophysical, marine and sanitation systems (coa		
2.1	Collect and analyze existing information on biophysical systems in Zanzibar(including, but not limited to climatic conditions, land use types, surface and subsurface water, water quality	Modeler, GIS specialist , Sanitation specialist and Marine biologist
2.2	Collect and analyze existing information on Zanzibar sanitation systems (including, but not limited to, existing and planned wastewater infrastructure (sewered and non-sewered sanitation systems), the institutional and policy environment on sanitation, capacity gaps analysis etc	Modeler, GIS specialist, Sanitation specialist and Marine biologist
2.3	Collect and analyze existing marine information on Zanzibar e.g., soil, benthic coastal habitat, in situ measurements of nutrients and pollutants along the coastal areas, habitat information etc.	Modeler, GIS specialist, Sanitation specialist and Marine biologist
Activity 3: Mapping impact of current and improved sanitation on coastal, marine, and		

BEST-Z (Protecting Zanzibar's

No	Activities	Responsible Person (s)
Activity 1: Institutionalizing the project in Zanzibar and recruitment of technical team		
1.1	Visit and presenting the project to management of TAMISEMI	Ruth and Victor
1.2	Inception meeting in Zanzibar	Ruth and Victor
3.1	Develop a high-resolution geospatial model(s) to measure and map nutrients and pathogen inputs from human sewage into the marine waters surrounding Unguja Island, Zanzibar and ground water sources on the island, as well as to estimate the potential exposure of its key sensitive coastal habitats (coral reefs and seagrass beds, for example) and ground water sources to these inputs.	Modeler and GIS speciliast
3.2	Understand the current sanitation infrastructure (levels of treatment, treatment efficiency, etc.) and establish a baseline scenario to reflect the current situation in terms of inputs into the marine waters surrounding Unguja Island and groundwater sources, with the above-mentioned model	Sanitation speciliast and marine biologist
3.3	Use the geospatial model to develop realistic scenarios of sanitation investments which can be simulated using the above-mentioned model to assess the impact that these investments could have on coastal and groundwater health.	Modeler, GIS speciliast, sanitation speciliast and marine biologist
3.4	Training workshop on modelling approaches, and sharing preliminary results with stakeholders for ownership and internal use	Modeler and GIS specialist
3.5	Workshop on mapping and identifying potential climate resilience nature based sanitation solutions for Zanzibar	Sanitation specialist
3.6	Development of an action plan for implementing the climate resilience sanitation solutions	Sanitation specialist
3.7	Workshop for validating the identified solutions and action plan	Sanitation specialist

BEST-Z (Protecting Zanzibar's resources from poorly

No	Activities	Responsible Person (s)	Timeline	2024			
				Aug			
Activity 1: Institutionalizing the project in Zanzibar and recruitment of technical team							
1.1	Visit and presenting the project to management of TAMISEMI	Ruth and Victor	Aug-24				
1.2	Inception meeting in Zanzibar	Ruth and Victor	29th Aug 2024				
3.1	Develop a high-resolution geospatial model(s) to measure and map nutrients and pathogen inputs from human sewage into the marine waters surrounding Unguja Island, Zanzibar and ground water sources on the island, as well as to estimate the potential exposure of its key sensitive coastal habitats (coral reefs and seagrass beds, for example) and ground water sources to these inputs.	Modeler and GIS speciliast	30th May 2025				
3.2	Understand the current sanitation infrastructure (levels of treatment, treatment efficiency, etc.) and establish a baseline scenario to reflect the current situation in terms of inputs into the marine waters surrounding Unguja Island and groundwater sources, with the above-mentioned model	Sanitation speciliast and marine biologist	30th June 2025				
3.3	Use the geospatial model to develop realistic scenarios of sanitation investments which can be simulated using the above-mentioned model to assess the impact that these investments could have on coastal and groundwater health.	Modeler, GIS speciliast, sanitation speciliast and marine biologist	15th August 2025				
3.4	Training workshop on modelling approaches, and sharing preliminary results with stakeholders for ownership and internal use	Modeler and GIS specialist	5th Sept 2025				
3.5	Workshop on mapping and identifying potential climate resilience nature based sanitation solutions for Zanzibar	Sanitation specialist	30th Sept 2025				
3.6	Development of an action plan for implementing the climate resilience sanitation solutions	Sanitation specialist	15th Oct 2025				
3.7	Workshop for validating the identified solutions and action plan	Sanitation specialist	30th Oct 2025

				Aug					
Activity 1: Institutionalizing the project in Zanzibar and recruitment of technical team									
1.1	Visit and presenting the project to management of TAMISEMI	Ruth and Victor	Aug-24						
1.2	Inception meeting in Zanzibar	Ruth and Victor	29th Aug 2024						
Activity 4: Designing small-scale pilots for nature-based sanitation solutions									
4.1	Participatory design of the pilot solutions	Sanitation specialist							
			15th Nov 2025						
4.2	Workshop for sharing the designs	Sanitation specialist							
			5th Dec 2025						
Activity 5: Outreach and stakeholder engagement									
5.1	Stakeholder mapping	Ruth and Victor	15th March 2025						
5.2	Strategic meetings with policy makers	Ruth and Victor							
5.4	Preparaion of relevant knowledge products for targeted stakeholders	Ruth and Victor and comms speciliast							
5.5	Presentation of project results in key stakeholder meetings	Ruth and Victor							
5.6	Publication of project results in journal papers	All	20th Feb 2025						
5.7	Final workshop	Ruth and Victor (workshop report)	28th Feb 2025

No	Activities	Responsible Person (s)	2024 Sep	2024 Oct	2024 Nov
Activity 1: Institutionalizing the project in Zanzibar and recruitment of technical team					
1.1	Visit and presenting the project to management of TAMISEMI	Ruth and Victor			
1.2	Inception meeting in Zanzibar	Ruth and Victor			
3.1	Develop a high-resolution geospatial model(s) to measure and map nutrients and pathogen inputs from human sewage into the marine waters surrounding Unguja Island, Zanzibar and ground water sources on the island, as well as to estimate the potential exposure of its key sensitive coastal habitats (coral reefs and seagrass beds, for example) and ground water sources to these inputs.	Modeler and GIS speciliast			
3.2	Understand the current sanitation infrastructure (levels of treatment, treatment efficiency, etc.) and establish a baseline scenario to reflect the current situation in terms of inputs into the marine waters surrounding Unguja Island and groundwater sources, with the above-mentioned model	Sanitation speciliast and marine biologist			
3.3	Use the geospatial model to develop realistic scenarios of sanitation investments which can be simulated using the above-mentioned model to assess the impact that these investments could have on coastal and groundwater health.	Modeler , GIS speciliast, sanitation speciliast and marine biologist			
3.4	Training workshop on modelling approaches, and sharing preliminary results with stakeholders for ownership and internal use	Modeler and GIS specialist			
3.5	Workshop on mapping and identifying potential climate resilience nature based sanitation solutions for Zanzibar	Sanitation specialist			
3.6	Development of an action plan for implementing the climate resilience sanitation solutions	Sanitation specialist			
3.7	Workshop for validating the identified solutions and action plan	Sanitation specialist

Activity 2: Data collection on Zanzibar biophysical, marine and sanitation systems (coastal and inland)						
2.1	Collect and analyze existing information on biophysical systems in Zanzibar(including, but not limited to climatic conditions, land use types, surface and subsurface water, water quality	Modeler, GIS specialist , Sanitation specialist and Marine biologist				
2.2	Collect and analyze existing information on Zanzibar sanitation systems (including, but not limited to, existing and planned wastewater infrastructure (sewered and non-sewered sanitation systems), the institutional and policy environment on sanitation, capacity gaps analysis etc	Modeler, GIS specialist, Sanitation specialist and Marine biologist				
2.3	Collect and analyze existing marine information on Zanzibar e.g., soil, benthic coastal habitat, in situ measurements of nutrients and pollutants along the coastal areas, habitat information etc.	Modeler, GIS specialist, Sanitation specialist and Marine biologist				
Activity 3: Mapping impact of current and improved sanitation on coastal, marine, and inland ecosystems						

BEST-Z (Protecting Zanzibar's

No	Activities	Responsible Person (s)	Monthly-timeline															
			4	5	6	7												
Activity 1: Institutionalizing the project in Zanzibar and recruitment of technical team																		
1.1	Visit and presenting the project to management of TAMISEMI	Ruth and Victor																
1.2	Inception meeting in Zanzibar	Ruth and Victor																
3.1	Develop a high-resolution geospatial model(s) to measure and map nutrients and pathogen inputs from human sewage into the marine waters surrounding Unguja Island, Zanzibar and ground water sources on the island, as well as to estimate the potential exposure of its key sensitive coastal habitats (coral reefs and seagrass beds, for example) and ground water sources to these inputs.	Modeler and GIS speciliast																
3.2	Understand the current sanitation infrastructure (levels of treatment, treatment efficiency, etc.) and establish a baseline scenario to reflect the current situation in terms of inputs into the marine waters surrounding Unguja Island and groundwater sources, with the above-mentioned model	Sanitation speciliast and marine biologist																
3.3	Use the geospatial model to develop realistic scenarios of sanitation investments which can be simulated using the above-mentioned model to assess the impact that these investments could have on coastal and groundwater health.	Modeler, GIS speciliast, sanitation speciliast and marine biologist																
3.4	Training workshop on modelling approaches, and sharing preliminary results with stakeholders for ownership and internal use	Modeler and GIS specialist																
3.5	Workshop on mapping and identifying potential climate resilience nature based sanitation solutions for Zanzibar	Sanitation specialist																
3.6	Development of an action plan for implementing the climate resilience sanitation solutions	Sanitation specialist																
3.7	Workshop for validating the identified solutions and action plan	Sanitation specialist
